- Prompt Engineering
- Cyber Security

EDUCATION

Full-Stack Development Course Zomin IT Park |
2024-2026

Python & Mobile Development
Mohirdev Platform | 2025

ABOUT ME

Hello, my name is Ozodbek Usmonkulov. Born in 2008, I combine my formal secondary education with a deep passion for software engineering. I am a young Full-Stack developer with 2 years of practical experience in building robust web and mobile applications using Python, Django, JavaScript and React Native.

I have technical knowledge, experience in configuring secure databases and working with systems such as local payment gateways (Payme, Click) and automated SMS services. In addition, I also have intermediate knowledge in cybersecurity research, OSINT, system vulnerabilities and Linux.

Despite my young age, I started to delve deeper into programming and organize more things.

EXPERIENCE

Frontend and Backend

Zomin IT Park

2024-2026

I have been working as an Assistant Teacher at the IT Park in Zamin district since 2022. I have worked as an assistant teacher in Backend and Frontend.

My Practical Startup Project: "Load Uz"

I developed a real Android startup application Load Uz, developed with a React Native frontend and Python/Django backend architecture. The project is currently in the advanced stages of integration with well-known services and identification protocols, including MY ID for user verification, and Payme and Click payment systems for secure digital payments.
